BOARD STRUCTURE FROM 2ND TO 7TH

In Gwin7Seven, the board structure evolves dynamically as participants advance through the system. From the 2nd board onwards, your position within each subsequent board is determined by the number of your direct members upgrading to upper boards and their respective positions within those boards. This innovative system ensures that advancement is based on merit and performance, rewarding active participation and leadership.

Key Features:

Direct Member Upgrades: As your direct members progress to upper boards, their positions within those boards influence your own positioning within the current board. The more direct members you have upgrading to higher boards, and the higher their positions within those boards, the greater your chances of securing a higher position within your current board.

Position Determination: Your position within the current board is directly linked to the performance and progression of your direct members. The system evaluates the upgrades and positions of your direct members and adjusts your position within the board accordingly, placing you in a position that reflects the overall success and advancement of your team.

Promotion to Next Board: Upon successful completion of your current board, which occurs when all positions are filled through upgrades and new entries, you are automatically promoted to the next board in the sequence. This promotion marks a significant milestone in your journey within Gwin7Seven and opens up new opportunities for earning and advancement.

Benefits:

Merit-Based Advancement: Advancement within the board structure is based on performance and active participation, rewarding individuals who contribute to the success of their team.

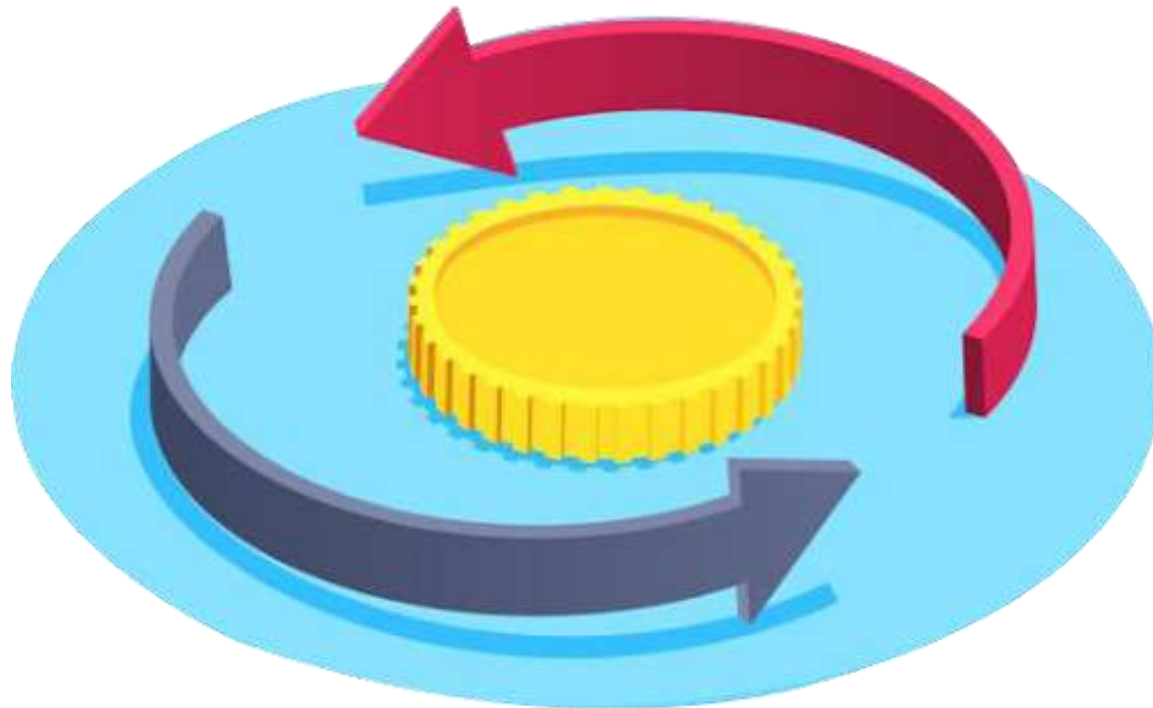

Transparent Evaluation: The system's algorithm transparently evaluates the performance of direct members and determines positions within the board, ensuring fairness and accuracy.
